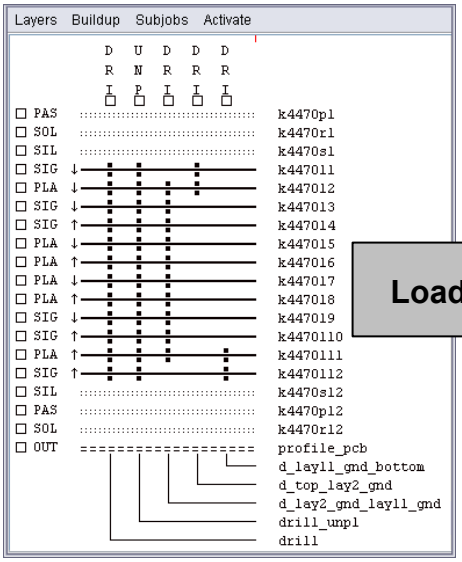
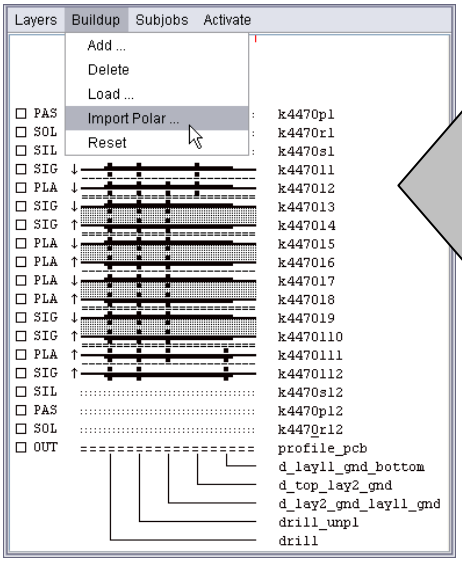
Ucam-Polar Link

Seamless Ucam/Polar integration
Using the best of both worlds

Ucam

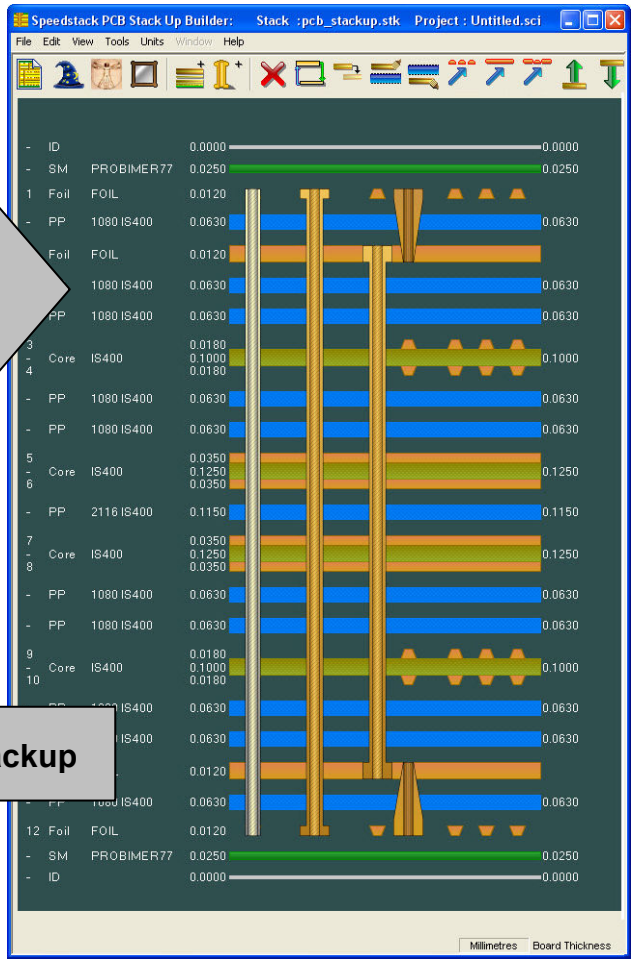




Load Job

Load Stackup

Polar



How it works

- Load the job data into Ucam v8 and define the layers
- Import the Ucam job file into Polar
- Use Polar Speedstack PCB to define the materials
- Import the stackup (.stkx file) into Ucam

- Eliminate double work
- Saves up to 15 minutes per job Polar time
- Saves up to 1 hour per job Ucam time
- Only one material database to maintain
- Less errors → Less scrap → Less Cost
